

How to Register Principal Entity (PE)-> Telemarketer (TM) Mapping On Airtel DLT Portal

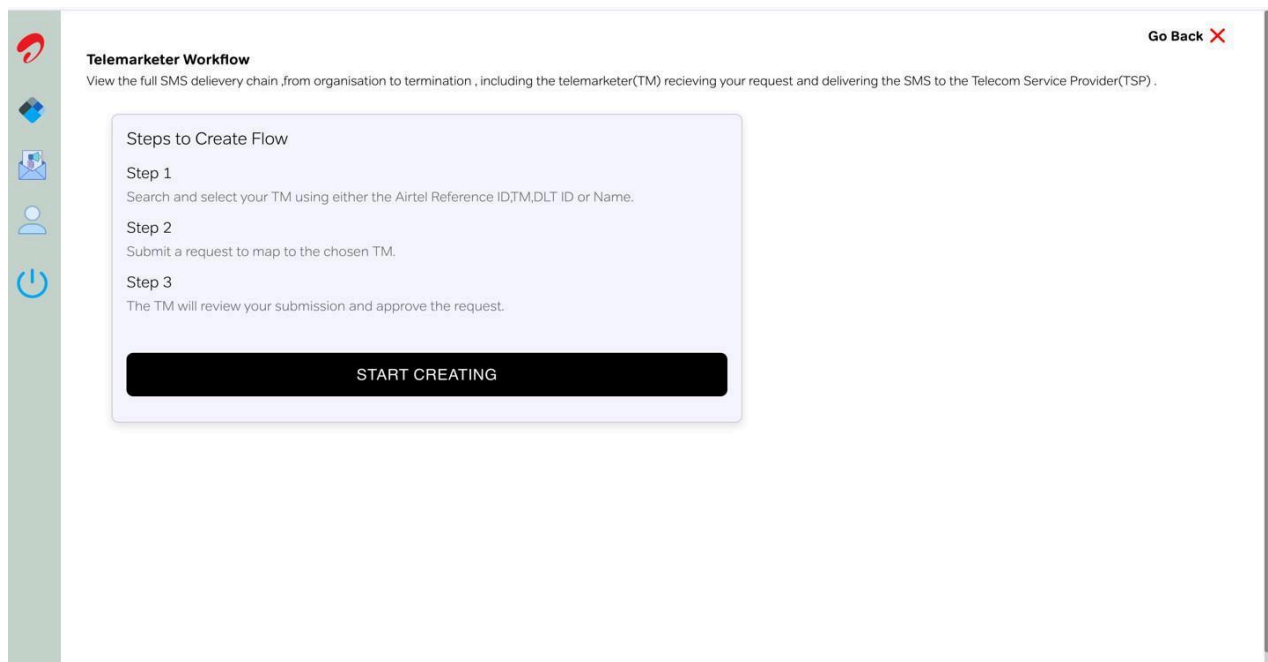

Step-1 Login To [Airtel DLT Portal](#) as a enterprise using your registered details, Go to DLT-> Manage SMS Workflow from Left Menu Bar

The screenshot shows the Airtel DLT Portal dashboard. On the left is a sidebar with the user's email 'sidhanth.chadha@airtel.com' and a list of navigation options: HOME, MANAGE HEADERS, MANAGE TEMPLATES, MANAGE CONSENT TEMPLATES, MANAGE COMPLAINTS, PURCHASE CREDITS, CONSENT VIEW, MANAGE VOICE WORKFLOW, MANAGE VOICE TEMPLATES, MANAGE CTA, and MANAGE SMS WORKFLOW (highlighted with a red box). Below these are icons for CAMPAIGN SCHEDULE, PROFILE, and LOGOUT. The main content area is titled 'Welcome to Airtel Commercial Communications'. It features four summary cards: '19 Active Headers' (with sub-cards for Blacklisted, Pending, and Rejected), '222 Active Templates' (with sub-cards for Blacklisted, Pending, and Rejected), '0 Total Credits' (with sub-cards for Balance and Consumed), and 'Account Details' (with buttons for Download Certificate, Extend Validity, and View Entity Details). On the right, there is a form to 'Enter New Brand Name' with a 'SUBMIT' button, and a section for 'Brand Names' with a list of names.

Step-2 Click on Register New PE- TM Mapping

The screenshot shows the 'List of Entity Workflows' page. The sidebar is identical to the previous screenshot, with 'MANAGE SMS WORKFLOW' highlighted. The main content area has a title 'List of Entity Workflows' and a button 'Click here to register New PE-TM Relationship Mapping.' Below this is a table with the following columns: Sl. No., Workflow Id, View Tagged Entity ..., Creation Date, Updation Date, Status, and Workflow. The table is currently empty, displaying 'No rows'. At the bottom right, there is a pagination control showing 'Rows per page: 100' and '0-0 of 0'.

Step-3 Click on Start Creating

Telemarketer Workflow Go Back X

Step-5 Choose your Telemarketer from the list C Click Proceed

The screenshot shows the 'Telemarketer Workflow' interface. On the left, a sidebar contains icons for a home page, a list of flows, a user profile, and a power button. The main content area is titled 'Telemarketer Workflow' and includes a subtitle: 'View the full SMS delivery chain ,from organisation to termination , including the telemarketer(TM) recieving your request and delivering the SMS to the Telecom Service Provider(TSP) .'. Below this, a 'Steps to Create Flow' section lists three steps: Step 1 (Search and select your TM using either), Step 2 (Submit a request to map to the chosen), and Step 3 (The TM will review your submission and). A modal window titled 'Search Telemarketer' is open in the center. It features a 'NAME' dropdown menu with 'Airtel' selected. Below the dropdown are 'Search' and 'Cancel' buttons. A table displays the search results for Airtel:

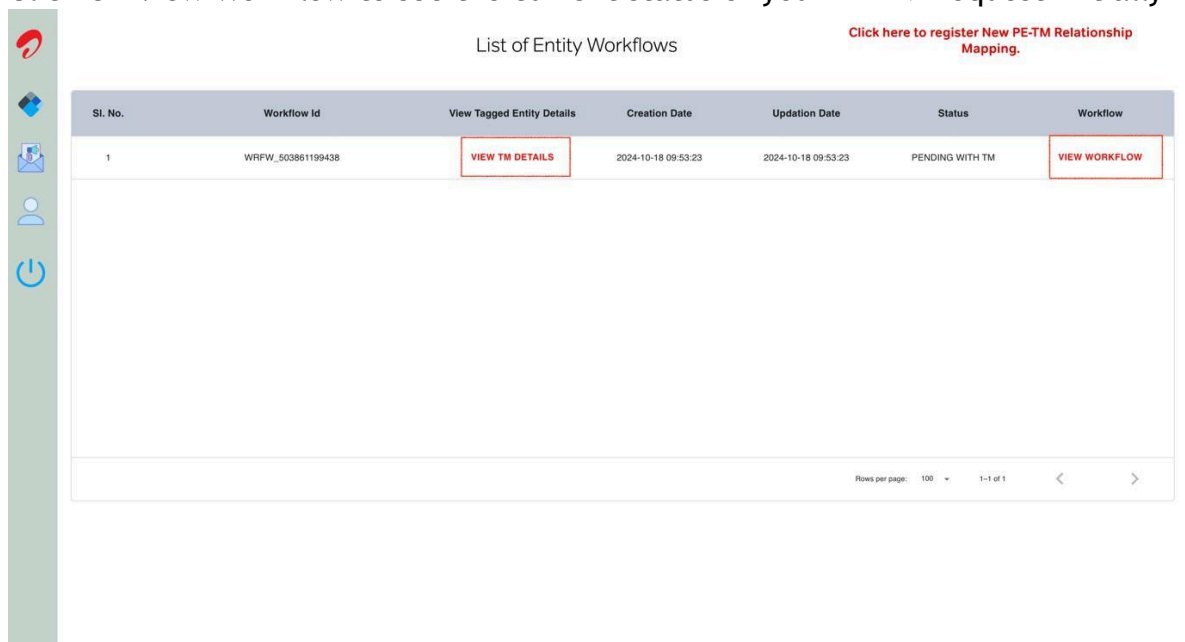

Name	Airtel Ref ID / DLT ID	Action
Airtel Digital Limited	1002466620000023188	Proceed

Step-6 Click On Save to Complete the Flow, The Approval Request will be sent to TM for Approval

The screenshot shows the 'Telemarketer Workflow' interface at Step 6. The main content area displays a flow diagram with two nodes connected by a line. The first node is 'Wynk Limited' with a green checkmark icon and the ID '1001105374145341669'. The second node is 'Airtel Digital Limited' with a yellow information icon and the ID '1002466620000023188'. Below the flow diagram is a 'Save' button. The sidebar on the left is identical to the previous screenshot.

Click On View Workflow to see the current status of your PE-TM Request initially it will be

in the pending state take the screenshot of this page and submit at 2Factor support mail id support@2factor.in - once the 2factor approved from their end than click on the view status and approve from your end by clicking on approve option.

Important Points To Note:

- All Principal Entities will be required to define their Telemarketer (TM) on the respective DLT Portals.
- Telemarketers (TM) must then either:
 1. Define whether they themselves are acting as the Telemarketer Delivery (TMD) who is responsible for final message delivery via Telecom Service Provider (TSP), or
 2. Select another TM who will further define their role as TMD or select an additional TM in the chain.
- Once the entire PM -> TM -> TM -> TMD chain is defined, the TMD must then hash the entire workflow to ensure compliance during SMS submission for DLT scrubbing.

List of Abbreviations used

Abbreviations	Details
PE	Principal Entity – Business Owner
TM	Telemarketer - Who is connected to PE and he is further connecting to another TM and/or TD but not with Operator.
TMD	Telemarketer Delivery - Who is directly connected with Operator (TSP) for SMS submission for delivery.
TSP	Telecom Service Provide- From where the SMS is getting originating
