

PE TM Chain Creation

User Manual
For Enterprises & Telemarketers

Overview

This document outlines the necessary steps required for PE - TM chain creation on DLT for Enterprises, Telemarketers for Aggregation Function (TM-AF) as well as Telemarketers for Delivery Function

The Chain can be initiated on any DLT by an enterprise. The TM's will need to login to the respective DLT Portal to approve or reject the request. The TM's which are not directly mapped to the same DLT as enterprise, will be given option to login to the DLT portal with limited access to access PE - TM Chains.

The chain has to be approved at all stages by all respective stakeholders like TM-AF as well as TM-DF. The Selection of TM-DF will mark the end of chain and it will be assumed that traffic will be submitted by TM-DF to the Telco DLT Network. Once the TM-DF is marked in the chain and its accepted by the TM-DF, a final request will go to PE for the approval of end-to-end chain.

PE as well as TM-AF are required to choose only the next hop to whom the traffic is being directly submitted. TM-DF will have no option to choose any next hop.

TM-DF are required to generate hash and submit the same in the TLV parameter, the process for which will be shared separately with all TM-DF.

Enterprise Login

1. To initiate the chain, enterprise needs to login to DLT and initiate a chain on DLT Portal. Go to <https://www.ucc-bsnl.co.in/> and Click on Login

2. Select Login as Enterprise and Click on NEXT

Select your Area of Operation
